EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with A. Isreal on April 15, 2004.

The application has been amended as follows:

In The Specification

Page 1, line 2, insert, -BACKGROUND OF THE INVENTION--

Page 1, after line 21, before line 22, insert, -BRIEF SUMMARY OF THE INVENTION--

Page 3, after line 3, before line 4, insert, -BRIEF DESCRIPTION OF THE DRAWINGS--

Page 3, after line 17, before line 18, insert, -DETAIL DESCRIPTION OF THE INVENTION--

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 10-15 is the inclusion of the limitations of a continuous stream ink jet printhead that includes actuator means disposed on an opposite side of the cavity to the wall for vibrating the ink in the cavity such that each

Art Unit: 2861

said jet breaks up into ink droplets, a standing wave being present in the ink in the cavity during operation of the generator; and the cavity having a cross-sectional area which varies along the length in a manner so as to tailor a form of the standing wave in the cavity such that each said jet breaks up into the ink droplets at a respective predetermined distance from the wall of the cavity. It is these limitations found in the claims, as they are claimed in the combination of, which has not been found, taught or suggested by the prior art of record that makes these claims allowable over the prior art.

The primary reason for the allowance of claims 16-18 is the inclusion of the method steps of a continuous stream ink jet printhead that includes vibrating the ink in the cavity such that each said jet breaks up into ink droplets, a standing wave being present in the ink in the cavity during operation of the generator; and varying the cross sectional area of the cavity along the length to tailor a form of the standing wave in the cavity such that each said jet breaks up into the ink droplets at a respective predetermined distance from said wall of the cavity; and permitting parameters of the operation of the generator to stray such that the cavity operates over a range extending substantially all the way between two successive resonances along the length of the cavity. It is these steps found in the claims, as they are claimed in the combination of, which has not been found, taught or suggested by the prior art of record that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2861

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
